

Aman Mulani

AI Full-Stack Engineer

+91 7378617999 | mulaniaman0504@gmail.com | aman-mulani.vercel.app

Professional Summary

AI Full-Stack Engineer building production AI agents and web applications across ecommerce and payments. Hands-on experience with Python, FastAPI, React, TypeScript, LLM integration, and retrieval-augmented generation (RAG). Own features from system design through frontend and backend development, testing, deployment, and production support.

Work Experience

Software Engineer, AI & Full-Stack | THG Ingenuity

Aug 2025 - Present

- Built and maintained an **AI Shopping Assistant deployed across 10+ ecommerce brands**, owning the agent backend, client SDK, and UI integration with Google ADK, AG-UI, and FastAPI.
- Integrated LLM APIs, tool calling, retrieval, and observability; deployed assistant services on **Google Cloud Run**. Reduced Shopping Assistant costs by **\$4,000+ per month**.
- Built an **Assistant Console** for tenant-specific agent configuration, behavior customization, and feature management.
- Built **RAG applications** covering document ingestion, chunking, embeddings, retrieval, LLM integration, and evaluation, with attention to response quality, latency, and cost.
- Delivered a **multimodal AI Stylist** within existing ecommerce journeys and automated support and operational workflows using Python, APIs, n8n, and LLMs.
- Designed and built a **multi-tenant CMS** with shared services and components, reducing duplicated infrastructure across business websites.
- Shipped storefront features and reusable widgets across **Astro, FastAPI, and GraphQL**; handled code reviews, testing, releases, and production delivery.

Product Engineer, Full-Stack | Razorpay

Apr 2024 - Aug 2025

- Designed and built a **configuration-driven push provisioning platform** that simplified partner integrations through a shared architecture.
- Developed **Python/FastAPI services for secure card tokenization** and lifecycle management, with validation and maintainability built into service design.
- Delivered features across **React, TypeScript, Python, APIs, and databases**. Improved reliability through automated and integration testing, CI/CD, and production monitoring.

Web Developer | HMX Media

Aug 2022 - Mar 2024

- Built internal tools that automated localization workflows and reduced repetitive engineering work.
- Developed reusable components and shared UI libraries with **React, JavaScript, Canvas, and WebGL** for interactive, performance-sensitive web experiences.

Projects

Codo - AI Code Review Agent

- Built a code review service using **GitHub Apps, FastAPI, Redis, and LLMs** to analyze pull requests and flag potential code quality and security issues.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL

Applied AI: Generative AI (GenAI), LLM APIs, RAG, embeddings, vector search, Google ADK, AG-UI, LangChain, LangGraph, AI agents, tool calling, Model Context Protocol (MCP), prompt engineering, evaluation

Frontend: React, Next.js, Astro, React Native, Tailwind CSS

Backend: FastAPI, Node.js, PostgreSQL, Redis, REST APIs, GraphQL

Cloud & Delivery: GCP (Cloud Run), AWS (S3, CloudFront, Route 53), Docker, GitHub Actions, CI/CD, Grafana

Engineering: System design, API design, automated testing, integration testing, Playwright, observability, production debugging, performance optimization, code reviews

Education

Bachelor of Computer Applications (BCA)

2020 - 2023

College of Computer Science and Information Technology
